Problem adding an additional report format for acq-14

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 17 and up

Description

After adding a new format for acq-14 by editing the p-acq-14.xml to add the new one as format-02 when running the job from the client, it says it is using format-02 but the output clearly says it is format-00.

Resolution

Please check the following:

1. Be sure you've defined the new "02" letter type as an option in the "List-Format:" pull-down menu in the vendor record in the xxx50/tab/pc_tab_exp_field.lng table (see line #3 below):

```
ACQ_LETTER_TYPE L Regular 00
ACQ_LETTER_TYPE L Order letter 01
ACQ_LETTER_TYPE L EDI Order List 02
ACQ_LETTER_TYPE L Foreign vendors - Former USSR 03
ACQ_LETTER_TYPE L Donation - thank you letter 08
ACQ_LETTER_TYPE L Urgent orders 09
```

Be sure to re-start the pc_server after making updates to pc_tab_exp_field.lng.

2. Do the following if you haven't already:

a. Run UTIL I/6 in xxx01 (e.g. usm01)
b. Run UTIL X/7 (clean utf files) in the vir01
c. Delete all versions of "acq-order-list-nn" in C:\AL500\Alephcom\files\USM50\PrintTemplates\eng\
d. Re-connect to the Acq client (the latest files from xxx01/form_eng will be downloaded) and run acq-14 again

3. Add a line to /xxx50/tab/form_description.lng [NOTE from table header regarding col. 2 (form format): "If left blank the entry will apply for all formats"] (e.g.):

```
! 1 2 3
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!-!!-!!!!!!!!!!!!!!!!!!!!!!!>
acq-order-list 02 EDI Order List
```

Be sure to re-start the pc_server after making updates to form_description.lng.
