
Self Check - patrons not blocked from charging items via SelfCheck

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.2.0
-

Description:

Bug Report For Issue 16384-19985

Date: October 10, 2012

Module(s): Voyager SelfCheck

Server platform(s) affected: Solaris

Release(s) replicated in: 8.1.2

Last version without bug (if applicable): 8/8.1.1

Expected results:

Patrons should be blocked from charging via selfcheck the same as they would be via Circulation.

Actual results:

Patrons are not blocked from charging via SelfCheck when Expired patrons, Max recalled items overdue, Max Self shelved items, Max Lost items, and Max recalls blocks apply.

Workflow implications: Patrons are allowed to charge items when they should be blocked.

Replication steps:

1. In Circulation, apply any of these blocks to the patron record: Expired patrons, Max recalled items overdue, Max Self shelved items, Max Lost items, and Max recalls
2. Charge an item via SelfCheck.
3. The patron is not blocked.

Workaround: None

Resolution:

Fixed in selfchk for 8.2.0.
