## OPAC display of repeating edit\_doc\_999\_aut\_xxx10.eng field

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

We have the following entry in the ABC01/tab table - edit\_doc\_999\_aut\_abc10.eng

```
## 678## D LBio./Hist. Data Y E  
## 680## D LPublic Note Y E  
## 7##### D LLink Y E
```

but only the first 680 displays in the OPAC. What needs to be done to display multiple occurrences of the 680 tag?

### Resolution:

Repeating the 680 line, with no "E" on the first occurrence, worked:

```
## 680## D LPublic Note Y  
## 680## D LPublic Note Y E
```

(You would need three lines for three occurrences; four, for four; etc.)
