
UTIL-H-1-10: "Bus Error" and "Segmentation Fault"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We've been working our our tab_base.eng and tab_base_z0102, here is the message we get when running UTIL-H-1-10 on these two files:

Checking Library type (tab10)

Z0102 Setup

Bus Error

When UTIL-H-1-10 is run against a slightly different version of these files it gives a "Segmentation Fault" message.

Resolution:

The problem had to do with the setup of tab00.eng.

The reserved word "alldocuments" uses the WRD index line when searching the database. You need to have a line like this in tab00.eng:

```
H WRD W-001 00 01 Words
```

After adding this line to tab00.eng, we were able to run the report.

You must have a WRD W-001 index if you want to use "alldocuments" as part of a base.
