

## transparentpixel.png problem persists after 4.1.2.

- **Article Type:** General
  - **Product:** SFX
  - **Product Version:** 4
- 

### Description:

It seems that the known issue with the transparentpixel.png didn't disappear completely after installing 4.1.2 SP.

When two SFX menus are opened at the same time and two target URLs are selected, the second one will show a blank window (with the URL "<BaseURL>/img/ajaxtabs/transparentpixel.png") in addition to or instead of the target URL window.

For screenshots, please check: <http://screencast.com/t/Dd3tjODK>

### Resolution:

From issue resolution:

Fixed in 4.2.1
