Question

Why are subfields sorted in order “e, n, d, c” in GUI client full view but in `./xxx01/tab/edit_field.lng` they are in sort order e, n, c, d (c and d the other way round)

Answer

In `./xxx01/tab/edit_field.lng` column 5 is not set which means that subfields are not sorted according to `edit_field`. If you want them to be sorted according to order in `edit_field.lng` add “B” in column 5

See also header of `edit_field.lng`

```
! COL 5. 1; ALPHA {A,B} ;;
```

```
! Filter;
```

```
! A or blank - filters for subfields, but does not change
```

```
! their order
```

```
! B - filters for subfields and sets their order;
```
