

ADAM full text index is not working

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Description:

I have defined the TXT field according to the document "[How to set up and use full text search for ADAM_yk.doc](#)". However, when I click the "Indexing" button to full text index the object, I see that the XML file that was created includes only one line with an error message ora_drg-11223.

Resolution:

See attached document [Problem solving with the TXT ADAM full text field yk.doc](#) for possible reasons and solutions
