
Diacritics not displaying correctly in Course number index.

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

Diacritics are not displaying correctly in the Course Reserves Course number Browse index.

Resolution:

Since the Course Reserve Course Number Browse is scanning the CNO Direct index, the title information which displays comes from the Z13 record.

Running p_manage_07 to rebuild the abc30 Z13 corrected the problem.
