## Masking carets for year in Web Brief list

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 14.2
- 

### Description:

Can anything be done to replace or do away with carets displaying in the short record display in the year column?

### Resolution:

An entry like this in the `./xxx01/tab/tab_expand` will change carets in the Brief list to spaces:

```
WEB-BRIEF fix_doc_space_char
```

You would need to add the new line (see above) to `tab_expand` and restart the `www_server`.

To make the brief list entries with carets (or spaces) for year sort after those with actual years, see SKB 8192-4472.
