
What order does ue_01 do its updates in?

- **Article Type:** General
 - **Product:** Aleph
-

Description:

KB 8192-2329 talks about "Indexes updated immediately; indexes updated by ue_01".

What order does ue_01 do its updates in?

Resolution:

The update_docx_2 program, called by the ue_01_a program, does its updates in this order:

```
CALL "ue_01_w" [Word indexes]*  
CALL "update_z103"  
CALL "update_docx_ind" [z11, also updated by save to server]  
CALL "update_short_docx" [z13, also updated by save to server]  
CALL "update_z00r" [also updated by save to server]  
CALL "update_sort_doc" [z127, also updated by save to server]  
CALL "update_acc"  
CALL "update_docx_z0101"
```

And "depending"...

```
CALL "update_docx_z0102"  
CALL "update_z120"
```

An independent ue_01_word_parallel process does the Word indexing.
