
Newly-added books retrievable by barcode but not by title

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

Last week, I cataloged two books, Diagnostic Imaging: Abdomen, barcode 100044467 and Diagnostic Imaging: Brain, barcode 100044469.

In ABC01, a barcode search brings up both records. However, neither a title, exact title or browse title brings up any record of the books. Can you tell me how to remedy this?

Resolution:

The following "ls" in the abc01 \$data_scratch shows that the abc01 ue_01 has not been running since Nov. 2:

```
abc1-18(1) ABC01-ALEPH>>ls -lrt *run_e_01.*  
-rw-rw-r-- 1 aleph exlibris 15106 Nov 2 23:55 run_e_01.27392
```

And the following SQL shows that there are 276 z07's waiting to be processed:

```
abc01@ALEPH0> select count(*) from z07;  
**** Hit return to continue ****
```

```
COUNT(*)
```

```
-----  
276
```

You need to do:

```
> dlib abc01
```

```
> util e , then 1, to start the ue_01 process.
```

I also notice that all of the following lines in \$alephe_root/aleph_start.private are commented out:

```
# setenv QUE_STARTUP_LIBS "$QUE_STARTUP_LIBS abc50"  
# setenv QUE_STARTUP_LIBS "$QUE_STARTUP_LIBS abc10"  
# setenv QUE_STARTUP_LIBS "$QUE_STARTUP_LIBS abc01"  
# setenv QUE_STARTUP_LIBS "$QUE_STARTUP_LIBS abc60"  
  
# setenv WORD_STARTUP_LIBS "$WORD_STARTUP_LIBS abc01"
```

```
# setenv ACC_AUT_STARTUP_LIBS "$ACC_AUT_STARTUP_LIBS abc01"
```

```
# setenv REQUEST_STARTUP_LIBS "$REQUEST_STARTUP_LIBS abc50"
```

This means that the batch que's, ue_01, etc., will not start when aleph is restarted. Unless there is some reason for this, these lines should all be uncommented.
