## Changing "Date From" default in Task Manager Batch Log

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
- 

### Question

The "Date From" in the Task Manager Batch Log is, by default, set to today's date - 30. Is it possible to change this?

### Answer

No. The value of today's-date-minus-one-month for the "Date From" value is hard-coded in the GUI program. The ability to change this default via a system option would be an enhancement request.

### Additional Information

The logs which appear in the Task Manager Batch Log display come from the \$alephe\_scratch directory. Logs could be deleted from \$alephe\_scratch after one, two, or three weeks, thus preventing their display in the Batch Log window. See KB 16384-55137 ("How to delete groups of files from \$alephe\_scratch").
