

Export File of MARC Records with GDC

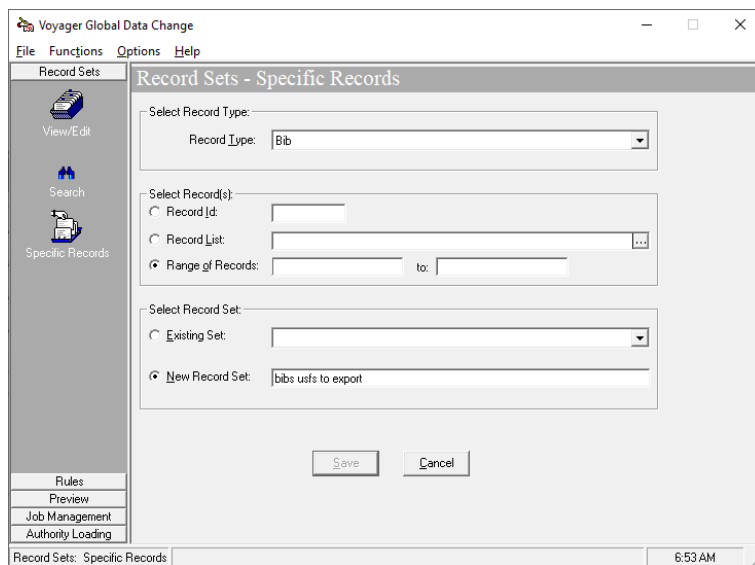

- **Article Type:** General
- **Product:** Voyager
- **Product Version:** 9

Question

Export a file of MARC records using Global Data Change (GDC)

Answer

1. First, create a record set using Record Sets - Specific Records with the BIB IDs of the records you want to export as MARC:

2. Then, you will need to run a Data Change Job to create a set of MARC records to export. This can be any data change job as you will *not* be actually performing the change. Select the record set created in the previous step and configure the "Update Database" setting to "Do not update database (preview)". The MARC records will be exported from the set of processed record files from the data change job:

Job Management - Submit Data Change Job

Job Parameters

Job Name: bibs usfs to export

Record Set Name: bibs usfs to export

Rule Set Group Name: bibs bible remove

Run Job: Now Later: [] []

Update Database

Update database

Do not update database [preview] 

3. Now go to: Global Data Change > Job Management > View Running/Completed.
4. Find Data Change job that processed record set for export.
5. Click "Get Result Files" button.

Status	Job Type	Update DB?	Job Name
Done	Data Change	Y	bibs subj afro-americans
Done	Data Change	Y	bibs auth sir walter scott
Done	Data Change	Y	bibs subj sir walter scott 600s
Done	Data Change	Y	bibs auth subj and subd cape verde
Done	Scan		obsolete fields dec 2014
Done	Scan		auths created locally
Done	Data Change	Y	mfhds 852 first ind 8
Done	Data Change	Y	bibs auth sh lacan
Done	Data Change	Y	bibs 100 d 600 d 700 d john bull
Done	Scan		bibs obsolete field scan jan 2015
Done	Scan		bibs obsolete field scan feb 2015
Done	Data Change	N	bibs usfs to export

Buttons: Delete Job, View Log, Delete Log, **Get Result Files**, Delete Result Files, Kill Job, Refresh

6. Select the "Before" file from the Job Result Files list.
7. Click Export

Job Result Files

File Type	File Name
Before	gdc.459.bibsufstoexport.20150211151807.marc_before.1
Unchanged	gdc.459.bibsufstoexport.20150211151807.marc_unchanged.1

Buttons: **Export**, View, Close List

8. Select file location & file name for record file.
9. Click Save.

Additional Information

- Default location for MARC record file can be set in GDC > Options > Session Preferences > Folders and Files > Folder - Binary MARC Records.
- See "GDC Execution/Job Management" in the Global Data Change document for more information
