

Change patron expiration date in local sub library

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

Change patron expiration date in local sub library

Procedure:

1. dlib library xxx50
 2. vi \$data_tab/tab31
 3. Update values in column 12 and 13
 4. Restart PC server
-

Additional Information

This change only applies for new patrons or patrons being updated after this change. In order to apply the values to the existing patrons, you will have to run service Update Patron Records (cir-77) option 'Update Expiry Date' with 'Run on local Patrons only' = Yes.

Since this is a major change the following is recommended:

- run the service in test environment first
- run only after backup of data is ensured
