
Automatic Item Process Status Change

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 21

Desired Outcome Goal:

Printing Labels does not change Item process status when using Label button in the GUI Items list.

Procedure:

The definition for Item Process status change is in ./xxx50/tab/tab42:

ITEM ##### PL ##

"PL" means "Print Label"

This functionality works from the Items menu > Print Item label. The functionality is not available when using the Label button in the GUI Items list.

Category: Cataloging (500)
