Question

What are the processes displayed when viewing the batch queue with util c/1?

Example:

```
*** util_c_01 - check USM01 batch queue ***
```

```
24038 pts/63 S 0:00 /exlibris/aleph/a21_1/aleph/exe/rts32 ue_01_a USM01.a21_1
24039 pts/63 S 0:00 /exlibris/aleph/a21_1/aleph/exe/rts32 ue_01_z0102_index USM01.a21_1
24040 pts/63 S 0:00 /exlibris/aleph/a21_1/aleph/exe/rts32 ue_01_word_parallel USM01.a21_1
24147 pts/63 S 0:00 /exlibris/aleph/a21_1/aleph/exe/rts32 ue_08_a USM01.a21_1 C
26753 ? S 0:45 /exlibris/aleph/a21_1/aleph/exe/lib_batch USM01
```

Answer

Ue_01 is the ongoing indexing process and ue_08 the process for updating BIB records from AUT records. The entry for lib_batch is the batch queue itself.
