## Oracle Security Alert for CVE-2012-3132

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Question

Can the Oracle Security Patch 13483152 (Oracle Security Alert for CVE-2012-3132), described at: <http://www.oracle.com/technetwork/topics/security/alert-cve-2012-3132-1721017.html> be installed?

---

### Answer

\*Our Security Officer and DBA check the description of each Oracle Security Alert and decide how relevant it is for Ex Libris data bases. This one was defined as low-level risk, and we are not going to certify it especially.

\*We plan to certify and release, for all Ex Libris customers, the cumulative October 2012 Oracle PSU (Patch Set Update). The PSU will be released for Ex Libris customers in November 2012
