

ORA-0600 errors for Z115

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

We have been observing occasional ORA-00600 internal error code errors since we upgraded to Aleph Version 20 / Oracle 11g. Trace files indicate that the error occurs when something in the Aleph application performs a 'select * from Z115' query. Submitting the same query from the SQLPLUS client does not produce the error message.

Since our Z115 table contains 0 rows, can we simply drop the table? Z115 is not included in the "Collected Oracle Tables - Version 20" document.

Resolution:

We see in the \$aleph_root/tab/file_list.USR that the z115 table can be in the \$usr_library.

As described in KB's 29551 and 4773, the z115 (data changes requests) is relevant only for German consortia with non-Aleph local systems. Other sites do not need the z115 table.
