

## SFX base URL is changing to Ex Libris DEMO everyday

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

SFX team is investigating a problem related to ALEPH/SFX interoperability and I had to change my SFX settings in ALEPH from `www_server.conf` to `aleph_start`.

After I did that I realized that ALEPH is now using to <http://demo.exlibrisgroup.com:9003/demo> as base URL everyday after the system is restarted during the night procedures. The only way to restore our base URL to ALEPH is to login to the server, source `aleph_start` and, then, restart the server.

So I want to check with you the following: should the base URL of SFX set in `www_server.conf` or `aleph_start`?

### Resolution:

In v18 and up, the `sfx_base_url` should be defined in in `aleph_start` and not in `www_server.conf`. This was done in order to use the SFX URL also in GUI.

---

## Additional Information

`sfx_base_url`
