## What do Claim, Cancel intervals in SysAdmin Vendor Policies do?

- **Article Type:** General
  - **Product:** Voyager
- 

### Description:

What do the Claim and Cancel intervals set in the System Administration > Acquisitions > Policy Definitions > Vendor Policies do?

### Resolution:

When a Claim Count, Claim Interval or Cancel Interval is present in the individual vendor record, this will be used on the PO and by Acqjob 1 in claims processing. However, when these settings are not available in the Vendor Record or PO, the settings from System Administration will be used instead.
