
Adding Order Status Date (Z68-ORDER_STATUS_DATE_X) to Order Index

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

I find the following line at the top of p. 112 in the ALEPH 17.01 Release Notes.pdf (On Doc Portal in: 17 -- General documentation -- Release Notes):

2. It is now possible to build an index for the Z68-ORDER-STATUS-DATE-X field.

I assume that this means that this field can now be included in the Order Index.

Resolution:

The meaning of this sentence is that an Oracle Index has been added. There was no change to the Order Index.

```
INDEX_NAME STATUS INDEX_TYPE UNIQUENESS COLUMN_NAME
```

```
-----  
Z68_ID VALID NORMAL UNIQUE Z68_REC_KEY  
Z68_ID1 VALID NORMAL NONUNIQUE Z68_ORDER_NUMBER  
Z68_ID2 VALID NORMAL NONUNIQUE Z68_SUB_LIBRARY  
Z68_ID3 VALID NORMAL NONUNIQUE Z68_ORDERING_UNIT  
Z68_ID4 VALID NORMAL NONUNIQUE Z68_ORDER_STATUS_DATE_X
```
