
SysAdmin Doc reports deselecting locations in Owing Libraries

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 9.1
-

Description:

Bug Report Form for Issue 16384-8338

Module(s): System Administration User's Guide

Expected results:

The System Administration User's Guide should explain that locations cannot be deselected from Owing Libraries; locations must be assigned to another owning library, at which point they are automatically deselected from the original owning library.

The System Administration User's Guide erroneously states that locations can be deselected from Owing Libraries.

Open the System Administrator's Users guide to 10-14 (rev. November 2014, 9.1.0)

The description for the Selected Locations option states:

List of Selected Locations.

Use the left-arrow button () to return Selected Locations to the Available Locations list. Use the double-arrow button to move all locations.

These buttons are not present. List is populated by selecting Owing Library from drop-down for each location in Location area.

Resolution:
