

## Can the configuration notes be updated?

- **Article Type:** General
  - **Product:** MetaLib
  - **Product Version:** 4
- 

### Description:

In a recent CKB update, there is "manual change" noted for "Global Books in Print"..."Optional: Update configuration notes and search hints."

I know how to update the search hints but have been unable to figure out how to update the configuration notes.

### Resolution:

The release notes are worded better for other resources but carries the same message: "Optional: Configuration notes updated."

This wording is an attempt to draw your attention to the fact the configuration notes have changed and customers should look at them for relevant information.

So, the configuration notes themselves don't have to be updated, but it is recommended that you review them and the IRD records they pertain to as the IRD may need to be updated.
