
Strange search results

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 4
-

Description:

I ran a quicksearch, but instead of results, it looked like the screen had refreshed, sans all of the image files!

Resolution:

This is one of many indications that you need to delete some of your utf_files:

```
>>cd $metalib_utf
>>cd utf_files
>>ls -rtl
drwxr-xr-x 4 metalib exlibris 4096 Jun 6 09:42 dat01/
drwxrwxr-x 4 metalib exlibris 4096 Jun 6 09:42 pds/
drwxr-xr-x 4 metalib exlibris 4096 Jun 6 09:45 ins01/ [*your instance library name may be different*]
drwxr-xr-x 4 metalib exlibris 4096 Jun 6 09:45 ins00/
drwxr-xr-x 3 metalib exlibris 4096 Jun 6 09:47 vir00/
>>cd ins01
>>pwd (just to be sure you're in the right directory!)
/exlibris/metalib/m4_7/utf_file/ins01
>>rm -rf *
```

Once the utf_files have been cleared you should be able to resume searching.
