

## Inclusion of patron status in cash-02 report

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 17.01
- 

### Description:

We use Patron Status to designate faculty, staff, students, etc., and handle their fines differently. Is there any way to have that field show up in the XML file generated by p\_cash\_02?

This information does appear (as z305-bor-status) in the cir-05 report.

### Resolution:

The patron status field is z305\_bor\_status. Checking the ./form\_eng/cash-transaction-report.xsl we find that there are no references to any z305 fields in this report.

This means the z305\_bor\_status can not be included ... without an enhancement to the program.

(Note: If one field of a particular record is included, that means that any other field of that type of record can also be included.)
