
When localizing a target the Crossref settings can't be changed

- **Article Type:** General
 - **Product:** SFX
 - **Product Version:** 4
-

Description:

When localizing a target by adding local parser and parse param that support Crossref you cannot change the Crossref settings.

Resolution:

From issue resolution:

Fixed.

The fix will be part of SP 4.5.1 scheduled to be released in April.
