
How to conditionally add supplier code to ill-patron-letter-i.xsl

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

On the information slip printed by clicking print button in borrowing list (ill-patron-letter-i-00), the Request Status shows Sent to Supplier. Is it possible for this line to show the supplier code?

Example:

Request Status Sent to supplier: USMIL

Resolution:

Yes, change the following code in ill-patron-letter-i.xsl from:

```
<xsl:call-template name="display-gen">
<xsl:with-param name="label" select=""Request Status""/>
<xsl:with-param name="value" select="."/z410-status"/>
</xsl:call-template>
```

to:

```
<xsl:choose>
<xsl:when test="."/z410-status = 'Sent to supplier'">
<xsl:call-template name="display-gen">
<xsl:with-param name="label" select=""Request Status""/>
<xsl:with-param name="value" select="concat(//z410-status, ':', //z411-partner-code)"/>
</xsl:call-template>
</xsl:when>
<xsl:otherwise>
<xsl:call-template name="display-gen">
<xsl:with-param name="label" select=""Request Status""/>
<xsl:with-param name="value" select="."/z410-status"/>
</xsl:call-template>
</xsl:otherwise>
</xsl:choose>
```
