

## Staff brief list / results display is blank

### Description:

When I do a staff keyword search or Browse, I can see numbers of results (such as, "Records 1 - 15 of 271"), but the list is blank; that is: no author, no title, and no call number.

### Resolution:

The tables involved in Brief list / Result display are the vir01 z05 and z110. Checking with util a/17/11/2 for vir01, I found that these tables did not exist.

These tables *should* be dropped/created with each run of clear\_vir01, but I found that the clear\_vir01 runs (in \$alephe\_scratch) have been getting this error:

```
ORA-01918: user 'VIR01' does not exist
```

This indicates that the create\_ora\_user was never run for this library.

I did util o/9, specifying "vir01" as the user, and the user was created successfully. I was then able to run clear\_vir01 without error. And I find that the Brief list / Results display is now working.
