

## Material type in field TYP

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Question

Why is the material type in field TYP set to “Manuscripts”.

---

### Answer

Material type “Manuscripts” is created according to configuration of field TYP in table `./xxx01/tab/tab_type_config.Ing`. It is created when field LDR has character “b” or “t” on position 06 of the field:

```
./xxx01/tab/tab_type_config.Ing:  
TYP Manuscripts LDR F06-01 EQUAL [b,t]
```

**Category:** Cataloging (500)

**Subject:** Items (500)
