
UTIL-G-3 does not work in MAB-library ABC30

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

We have created ABC30 with open_new_library-script and have used MAB30 as template library.

Now in UTIL-G-3 we get:

Initial values can not be created for a demo library (when base_demo_lib = active_library)

Resolution:

The reason was the missing parameter

BASE-DEMO-LIB=2

in tab100 of ABC30.

After adding this parameter, UTIL-G-3 works.

Unfortunately this switch is currently missing in tab100 of demo library MAB30.

We will add this parameter in one of the next SPs.
