

There are suspended jobs" message trying to exit unix

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

When I enter the "exit" command on the unix command line I get the response "There are suspended jobs", and my session is still active.

Resolution:

The "jobs" command should show you any suspended jobs.

If you enter "exit" a second time, it should cancel the suspended jobs and let you exit.
