
Preventing session ID display on first OPAC screen

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We want to remove the Session ID from the initial OPAC page to prevent users from bookmarking the library link with session id. How can we do that?

We re-configured our www_server.conf file as following:

```
#  
setenv server_f "&server_httpd/F/&session"  
setenv server_f_ssl "&server_httpsd/F/&session"  
setenv server_f_start  
"&server_httpd/F/?func=find-b-0&local_base=abc01pub"
```

but that doesn't help. (We are in Aleph 18.01.)

Resolution:

[From site:]

I thought we were using the "find-b", but find that we are actually using "login".

The problem was solved by reconfiguring the "login" screen.
