
Changes to www-ill-in-print.trn aren't in effect

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

When I add information to the z410-status line in www-ill-in-print.trn, the text change is not reflected in the print forms. When printed, the status appears to be MED, when in the z410-status line in www-ill-in-print.trn indicates that MED=Mediated.

I added several categories to www-ill-out-print.trn which did take effect. Why?

Resolution:

Lending - \$alephe_root / form_eng / www-ill-in-print.trn - the status should be z416-status (not z410 which is for borrowing requests), example:

z416-status TEXT S MED=Mediated LOC=Located WAP=Waiting_for_process SHP=Ship CLS=Close DEL=Deleted
EXP=Expired SV=Sent_to_supplier

Please note that lending statuses are different from borrowing statuses (listed in WEB ILL System Librarian Guide).

Additional Information

www-ill-in-print.trn, lending request statuses, z416-status
