
Adding port to Services > General > Restart servers menu

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We recently added a new OCLC port for our new (7th) ADM: 7511. I wanted to add it to the menu for the "restart servers" service, but I can't figure out where I need to add it.

What file/where do I need to edit to add the option "DEP OCLC: 7511"?

Resolution:

In the file \$aleph_root/pc_b_eng/p-sys-01.xml change the "hidden" to "edit"
Thus, change this section:

```
<control>  
<hidden>  
<argname>F02</argname>  
<label>Port</label>  
<size>100</size>  
</hidden>  
</control>
```

to this:

```
<control>  
<edit>  
<argname>F02</argname>  
<label>Port</label>  
<size>100</size>  
</edit>  
</control>
```
