

Locating bib records with a 130 field

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

Is there a way to identify all the bib records that have a 130 field?

Catalogers say the 130 should be "uniform title as main entry," so should be indexed as author. We only index the 130 as title currently.

I could use manage_21 if I could get a list of system numbers.

Resolution:

Run p_ret_01, specifying 130 as the Tag, to create an outfile with the record numbers in it.

That file can then be used as input to p_manage_21.
