
s failing after critical patch update ("libclntsh.so.9.0: wrong ELF class")

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

After critical Oracle patch update, I am getting the error below on executing s+ or sqlplus from the aleph16 user. Executing sqlplus from Oracle user is ok.

```
ABC50-ALEPH16>>s+ abc50
```

```
ld.so.1: sqlplus: fatal: /aleph/app/oracle/product/920/lib32/libclntsh.so.9.0: wrong ELF class: ELFCLASS32
```

```
Killed
```

How should I proceed?

Resolution:

Site did:

```
> chmod +r /aleph/app/oracle/product/920/lib32/libclntsh.so.9.0
```

and

```
> chmod +x /aleph/app/oracle/product/920/lib32/libclntsh.so.9.0
```

SQLPLUS is now working.

Additional Information

Oracle patch update
