
Change p-acq-11 (acq-claim-o-report) Sort

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

It looks like p_acq_11 has its sort hard-coded on order number. This is not particularly useful. Is there a way to sort by title?

Resolution:

When I printed acq-claim-o-report, it sorted by z68-doc-number.

You can sort by any field in the XML/XSL file by inserting the following line:

```
<xsl:sort select="YOUR-FIELD"/>
```

in the XSL file. For example:

```
<xsl:sort select="order-number"/>
```

will result in sorting by order number.

Using the example above, the following excerpt shows where it should be placed:

```
<!--section-02 (GRID)-->
```

```
<xsl:for-each select="//section-02">
```

```
<xsl:sort select="order-number"/>
```

```
<xsl:if test="position() = 1">
```

```
<xsl:call-template name="section-02">
```

```
<xsl:with-param name="header" select=""header""/>
```

```
</xsl:call-template>
```

```
</xsl:if>
```

```
<xsl:call-template name="section-02"/>
```

```
</xsl:for-each>
```
