

Documentation for Apache installation in v.16

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

Could you provide us with Apache installation and configuration documentation for Aleph v16?

What I need especially is information on the www environment after Apache installation, including www_server.conf setup, aleph_mod setup and its usage and httpd.conf setup (for example some variables in www_server.conf are rather obsolete, like some icon links, www_base, www_con_lng).

The latest documents available at DocPortal are: How to Install and Configure the Apache Server and SSL (Optional) ALEPH 15 and MetaLib 2.0.pdf and How to Install aleph_module.pdf.

Resolution:

Please see the document "How to Install and Configure the Apache Server and SSL (Optional) ALEPH 15 and MetaLib 2.0.doc".
