

What is the Z96?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 19.01
-

Description:

I see references to Z96 in the www_server log, such as:

Found in buf : 000000001 Z96 : 012000229650

but I don't find it listed in the Aleph Oracle tables.... What is it?

Resolution:

The structure of the z96 can be seen in the ./alephm/source/copy/Z96:

01 Z96-WORDS.
02 Z96-FIELD-NUMBER PICTURE 9(3).
02 Z96-REC-NUMBER PICTURE 9(9).

It is used in certain set_server, www_f, and b_manage_01 programs, but it is **not** actually an Oracle table: there is no z96 in ./alephm/sql_tab and no entry in any ./aleph/tab/file_list.xxx.

It is a temporary table, related to the "word3". The values which populate this temporary Z96 com from the z97 and z98 (/z980) tables.
