

Crossing brief recs results in history

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 15.5
-

Description:

Problems with crossing results sets from Brief recods

Resolution:

The Brief records - z0101 - are access points to the record, and they are not linked directly to the records. Z0101 are built on z01.

See documentation "Brief Records Functionality".

Note that sets from z0101 (Brief records) are empty, and therefore cannot be used for crossing.

Additional Information

brief records, z0101, cross
