
Exclude ILL from client package

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We would like to exclude the ILL modules from the packaged client. Before packaging I modified the GUI500.INI file to exclude the ILL modules:

Acq=Y

Alephadm=Y

Catalog=Y

Circ=Y

III=N

III2=N

The ILL modules were packaged anyhow with USM defaults. Am I misunderstanding how this should work or is it not working properly?

Resolution:

To install only modules with =Y, please also change in GUI500.INI the line InstallType=Typical to the line

InstallType=Custom

In this case, when installing GUI, only modules with =Y will be installed, and modules with =N will be not be installed.

Example:

; May be Typical or Custom

InstallType=Custom

Acq=Y

Alephadm=Y

Catalog=Y

Circ=Y

III=N

III2=N

GUI500.INI, client, modules, GUI installation
