
Need to add bibliographic information to the pick slip

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 17.01

Description:

We need to add serial information to the pick slip for the serial requests.

We have customized www-ill-in-print-01.xsl and can get the z13-title, z13-author, z13-imprint, z13-isbn-issn, z416-request-media to print.

How do we get the information for title of part (74002), Author of part (70012), issue information (901\$\$a, ISS\$\$y)?

Resolution:

To print Title of part (74002), Author of part (70012), and issue information (901\$\$a, ISS\$\$y) on a lending slip, please add the following line to www-ill-in-print-01.xsl where you would like to see it as the next line:

```
<xsl:call-template name="bib-info-hdr"/>
```

Additional Information

bib info, incoming request slip, www-ill-in-print.xsl
