

Create Z00_ID: "such column list already indexed"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 17.01
-

Description:

In doing util a/17/2 All for our bib library, we get these errors:

```
SQL-ALEPH_ADMIN> CREATE UNIQUE INDEX PLN01.Z00_ID ON PLN01.Z00 (Z00_DOC_NUMBER ASC)
```

ERROR at line 1:

```
ORA-01408: such column list already indexed
```

Resolution:

This message indicates that the z00_id Oracle index is already present.

Do util a/17/14 for the xxx01 z00.

If it shows z00_id as present and valid, you are done.

If it shows z00_id as present but not valid, do util a/17/3.

If it shows that z00_id does not exist, then try doing util a/17/2 for z00 specifically.
