
Acq GUI "Index List" labels not in .Acqtabxxxwindow.dat

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Looking at the GUI Acquisitions screens, I find that the text for most of them is in the .\Acq\tab\eng>window.dat, but some of the text -- such as the labels in the Index List ("Sublibrary", "Invoice Status:", "'From' Order Date", etc.) -- see attached -- are not.

Where are they?

Resolution:

Though many of the labels in the GUI Acq/Serials screens come from the .\Acq\tab\xxx>window.dat file, in cases where the screen can be accessed from some other module its labels are placed in the shared .\Alephcom\tab\xxx>window.dat file.

That is the case with these Index List labels.

Jerry
