## DEFAULT-ADDRESS switch not working with Fast Patron Registration

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

I have added DEFAULT-ADDRESS 02 999 to tab100 in ABC50.

The address created when FastPatronRegistration (in circ.ini) is N is 02.

When FastPatronRegistration is Y, the address created is 01.

We use the Fast Patron Registration and address 02...

(FYI, the infinite date seems to work in both cases - the date remains at 0000/00/00.)

We are at SP 781...

### Resolution:

[New answer:] See KB 16384-32641.

[Old, obsolete answer:]

The address type is hard-coded as "01" in the program.

"Since in fast registration the staff user wishes to enter as little info as possible to keep it fast and short. Addresses type 02 etc. can be added later in the addresses tab."
