
p-acq-17 output repeats lines three times.

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

In the output of p-acq-17, the order is repeated for each parent and granparent budget, if service is run on Hierarchy mode.

Resolution:

Solution by Yoel K:

In bibliographic library \$data_root/form_ing make a backup of the file orders-per-budget.xsl.

Then edit it as follows:

Instead of this:

```
<!--section-02 (GRID)-->  
<xsl:for-each select="//section-02">  
<xsl:if test="position() = 1">
```

Put this:

```
<!--section-02 (GRID)-->  
<xsl:for-each select="//section-02[not(.=preceding::section-02)]">  
<xsl:if test="position() = 1">
```

See <http://www.w3.org/TR/xpath/> especially these sections:

3.3 Node-sets

3.7 Lexical Structure

Run util I 6

Reconnect to GUI

Additional Information
