## In send-request-letter, significant parts of BIB info missing for serials

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

In send-request-letter, significant parts of BIB info missing for serials. If I create a serial request and specify enumeration, chronology, pages numbers and an article name, only the year and the month of the issue appear in the letter.

### Resolution:

This problem has been solved by rc 315 - please follow the implementation notes to implement the fix.

Other ILL2 users have then added something like this in ABC40/tab/edit\_field.eng to enable a clearer display of the info in the letters:

```
1 # ISS## D
2 v A Vol.
2 i A Issue
2 p A Pages:
```

This issue is still open and was escalated to Development for further investigation <2007-03-04 01:00:05>.
