## Paging/hold slips not printing; ue\_06

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

Our paging slips currently aren't printing. We can manually print item slips, recall letters, etc.

### Resolution:

The routine which processes hold requests and produces paging/hold slips (and unavailable notices) is ue\_06 (the "Request daemon").

I found that the abc50 ue\_06 stopped at 7:40 this morning (when the connection to Oracle was temporarily lost.)

I restarted it, and it has successfully processed the 10 requests which were queued up waiting for it:
