

Fast cataloguing FMT field

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 15.2
-

Description:

When creating a BIB record using fast cataloguing, the FMT field is filled by the default (depending from LDR).
Is there a way to decide which format we want the system to put in?

Resolution:

The FMT that you see displayed is defined in `pc_tab_acq_fast_cat.eng` (col. 2) of the bib library.
Check which bib library table is used (try checking this with `pc_server out`) and change that value.

Additional Information

fast cataloguing, FMT, `pc_tab_acq_fast_cat`
