Description:

Our circulation staff just discovered that Science sublibrary (MVCSC) is no longer listed as a pickup location when putting a hold request on a book. Only the Main sublibrary (MVCMN) appears in the drop-down menu.

Resolution:

The tables involved in this are the xxx50 tab37 and tab_sub_library.

If you look in your tab37, you'll notice that the first line has an incorrect code for the Science Library. It has "MCVSC" instead of MVCSC:

```
! 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15
!!!!-!!-!!-!!-!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!-!!!!
MVCMN ## ## ## # MVCMN MCVSC <-----
MVCSC ## ## ## # MVCSC MVCMN
```

If you correct this and restart the servers, everything will be fine.
